

SymSol IP-PABX

Symmetric Solution

Global Specifications

SymSol IP-PABX is an innovative solution for small and medium business. It provides voice over IP in multiple protocols, and comprehensive communication/telephony system. Fully customisable, it combines highly advanced technology with a simple graphical interface.

SymSol IP-PABX will increase your communication possibilities, combining all networks. The CPPI (Cross Platform Phone Integration) allows you to combine multiple land lines, SIP and IAX2 Voice over IP trunks within a single PBX system.

SymSol IP-PABX support remote connection to PBX system, making it an ideal system for multi-office environment. The phone (or the soft phone) could be plugged in into any network with Internet access. It will log in into your virtual PBX and be ready to start making and taking office calls.

SymSol IP-PABX has a support of all standard PBX functions, as call transfers, conferences, call parking, voice mail and many others. One of the most important PBX feature is the flexible TBR (Time Based Rules) which can be configured according to your business schedules, handling open and closed office hours, and emergency forwards.

SymSol IP-PABX features ICM (Intelligent Call Management) which is a set of flexible, customisable rules, that define calling policy of your company. In combination with VoIP plans, which can be easily embedded into the appliance with CPPI. It will make a huge saving on your monthly bill.

SymSol IP-PABX is highly scalable. It can have up to 30 extensions on one appliance and can combine up to 10 other local or remote appliances. Therefore the telephone infrastructure can grow as your business expands.

The functionality of **SymSol IP-PABX** makes it possible to design the system specifically for you, matching YOUR rules and policies.

SymSol IP-PABX comes with no hidden costs and licenses as it's built using an open source software. Making it not just powerful, but also a cost effective solution for small or medium business.

This solution is developed and integrated by Symmetric Solutions .
